SECRET

		- 2 -
25X1	5.	an officer of the Schmidt unit stated that most of the
25X1		tanks of this unit were T-43 tanks. A small number were IS-2. A few T-34
25X1		served for training purposes. all these tanks had already been used and a large number had even seen action during
20/(1		World War II. 3
25X1	6.	numerous howitzers and AA guns were seen parked in
		Eggesin.
	7.	The morale of the troops of Armeegruppe Nord was still poor, with most of the men only striving for discharge and the officers being disillusioned as a result of lack of discipline and authority. A mutiny which, in the presence of General urmann entzsch occurred during a motion picutre performance in Eggesin when soldiers refused to leave the theater that
		had been occupied half by officers and half by soldiers resulted in the arrest of the main instigator and the discharge of about 450 officers and troops. When numerous VPs fell sick as a result of contaminated food,
25X1		eighteen members of the labor force of a supplying butchery were arrested on charges of sabotage. a signal officer was arrested because he had maintained radio communication with a western station and had supplied information on the VP to a western agency.
	8.	Senior Lieutenant Schleeft , officer in charge of rear services with the S-6 regiment stated that he was scheduled to serve as provost marshal, since he had been a student of law.
25X1	9.	
25X1	1.[Comment. It is believed that this measure was not linked with any "rigged" political demonstrations in Berlin. Measures of this sort had already previously repeatedly been taken in conjunction with special exercises, deserters indicated.
25X1	2.	Comment. The information confirms that the AAA regiment and the mortar regiment of the Eggesin mechanized division are quartered in the installation in Altwarp. The information on the organization of the mortar regiment under the command of Major Auerbach cannot be checked. It is possible that the personnel from Prenzlau may have a used to bring the mortar regiment
25X1		to full strength. gas details belong to each regiment.
25X1		It is, however, not definitely clear whether the information refers to these details.
25X1 25X1	3 . [Comment. the heavy tank SP regiment of Major Schmidt is equipped with about 80 to 90 IS-2 and about 20 ISU-122.
25X1 25X1	4.[Comment. The unreliability of the KVP became evident during the aprising in East Germany.
25X1	5.	Comment. The information again confirms that the paramilitary
25X1 25X1	ļ	training which had been planned was dropped. a course for officers in charge of administrative outleswas given in Rostock under the command of Major Krusbert, who probably is
25X1		the Major Kuschbert mentioned in the present report.
